

"There are MILLIONS OF DOLLARS invested here in the LATEST EQUIPMENT; you will find it throughout all the rooms of this ADVANCED technical laboratory. Each of our workers has undergone EXTENSIVE TRAINING, and they are using the VERY LATEST TECHNIQUES. Others before us have worked on this for decades. Some have given their lives to the task. Just now we're working on biochemical compounds. A few have been synthesized, but we have a lot more to go. Yet that's only the beginning. There is so much we don't know yet. But if SOMEHOW we can put it all together—and get the result to COME ALIVE, we can synthesize LIFE,—and we will have shown that NO INTEL-LIGENCE was necessary to form it back in the beginning!"
