HARD
PLACE~

"There is GREAT confusion among the rocks, because so many strata are out of place, but we know the dates of the fossils because it is the rock strata that dates the fossils within them."

"There is GREAT confusion among the fossils because they are scattered in piles, but we know the dates of the strata the fossils are in, because the fossils date each stratum they are in."

Pick
out
a
BONE~

"There is GREAT confusion among the index fossils because they are frequently out of place—and every so turn up alive! So our official list of index fossils keeps shrinking in number. Yes, we date both strata and and fossils by the index fossils."
