

LINNAEUS' SYSTEMA NATURAE

This is an early edition of Linnaeus' *Systemic Naturae*. It was the first published attempt to classify the Animal Kingdom by logical reference to the outer form of the animals. The book is opened to the cat family. The handwritten notes on the facing page are additions and corrections by the author's son.

MAMMALIA FERRE. F. 6.

F. 6. canis domesticus, corpus breviter elongatum, ...
